FAX: +2711 791 6718
Postal Address: P O Box 1551, Fourways, Sandton,
2055, South Africa.
Physical Address: Unit 12, Tungsten Industrial Park,
5 CR Swart Dr,
Strijdom Park, Randburg, 2169, South Africa,

Unique Core Trays

The trays have been designed and manufactured to ensure local and international safety standards have been adhered to. The safety aspects include:

- The core trays are designed to optimize handling.
- Multiple handing points, with ergonomic sides for safe and controlled handling.
- Stacking positions of the core trays ensure that the fingers of the person are away from the weight bearing locations.
- No Sharp Edges, ensuring safe interaction with the trays.
- Maximum weight has been limited by design with overall weight of any tray being below 50kg.

The other geological scope design benefits from the UCP Africa core trays are:

- Increased core access and visibility (48% core visibility).
- Stackability and interstackability of the different size core trays.
- Inconsequential contamination.
- Quick onsite assembly which allows for decreased transport, storage and assembly costs.
- UV stabilized plastic ends with sufficient writing space.
- Excellent water drainage.

The UCP core trays are designed to nest and are packed in cartons for ease and cost-effective transport. Each carton includes 25 trays, enough UCP Africa core depth markers for 3m runs and two paint markers which provides clients with a convenient offering. At UCP Africa, we have utilized our extensive experience in core tray manufacture and supply to design and produce a completely new style of Core Storage Solution for the global market.

Our goals are to generate efficiencies through design:

- Avoid bottlenecks in core splitting and core logging operations.
- Avoid high cost of transport and storage of core trays in waiting.
- Increased ability to manually handle the core tray.
- Provide a product which is both safe and cost effective.

All while producing a product which:

- Protects and correctly stores valuable core samples.
- Performs all existing required functions of a core tray.
